Excalibur

Club Car 48 VOLT - 15 AMP Golf Cart Charger

FEATURES AND SPECIFICATIONS

- Advanced high frequency switching mode power supply technology
- DC output isolated from AC input
- Completely automatic battery charging: CC, CV and Floating
- 2 LEDs: LED1 Red (power on), LED2 Red/green (charging/full)
- Protections include short circuit, over-voltage, over-temperature, reverse polarity protections and over-heat protection (when charger's inside temperature up to 75 celsius, it stops charge for about 10 seconds then recovers automatically)
- Forced ventilation with fan controlled by temperature (the fan runs when the chargers inside temperature exceeds 40 celsius)
- 1 year warranty

NOTE: Most Club Car models require the On Board Charge Controller (OBC) to be bypassed to allow this charger to function correctly and use its own smart charge capabilities. Bypass wire and instructions included in box with charger or click HERE to access the instructions directly.
